

# COMPANY PROFILE

We're Stallion Riders, a growing Bicycle manufacturing and assembling startup committed to delivering bicycles of the highest quality, giving every client the satisfaction of having highest quality products that are locally manufactured. After forming the company in August 2020. We started production from the grassroots in March 2021, combining imported parts with those sourced from local businesses, creating an employee base of 50 personnel dedicated to our mission of building bikes that are of good quality and unique to Sri Lanka. We are working towards our goal of converting to a manufacturing process that is localized, a bid to bring in quality products that are long lasting in to the country. It is a challenge, but those have always pushed us to do better. We are a women owned business, and our director Ms. D.K Dissanayake is also no stranger to a challenge. She saw the potential of the bike industry, and decided to invest her 10 years of experience working within it towards creating Stallion Riders.

Stallion Riders has the capability to design and create high-quality bicycles that cater to the unique requirements of customers in various countries, all at affordable prices. With knowledge and experience in the Asian, Middle Eastern, and Australian markets, the company has established recurring orders with clients in India and Australia.

# OUR PRODUCTS

We are familiar with the following,

## Wheel Sizes

20", 26", 27.5", 29", 700C

## Materials

Steel, CR-Mo steel, Alloy, Carbon

## Types

MTB, Road, City, Hybrid, Electric

Stallion Riders has established strong connections with local manufacturers and is directly registered with prominent component suppliers in the bicycle industry, including Shimano. The company also maintains favorable relationships with suppliers from India, China, Taiwan, Australia, and Singapore, ensuring access to top-notch components at competitive prices.

# OUR FACILITIES

State of the art production line with air tools, in house painting facility, wheel building line including semi-automated machines for Nipple inserting, tightening, aligning and tyre/tube insertion with a dedicated quality assurance team.

Standard product output capacity of 10,000 bicycles per month.

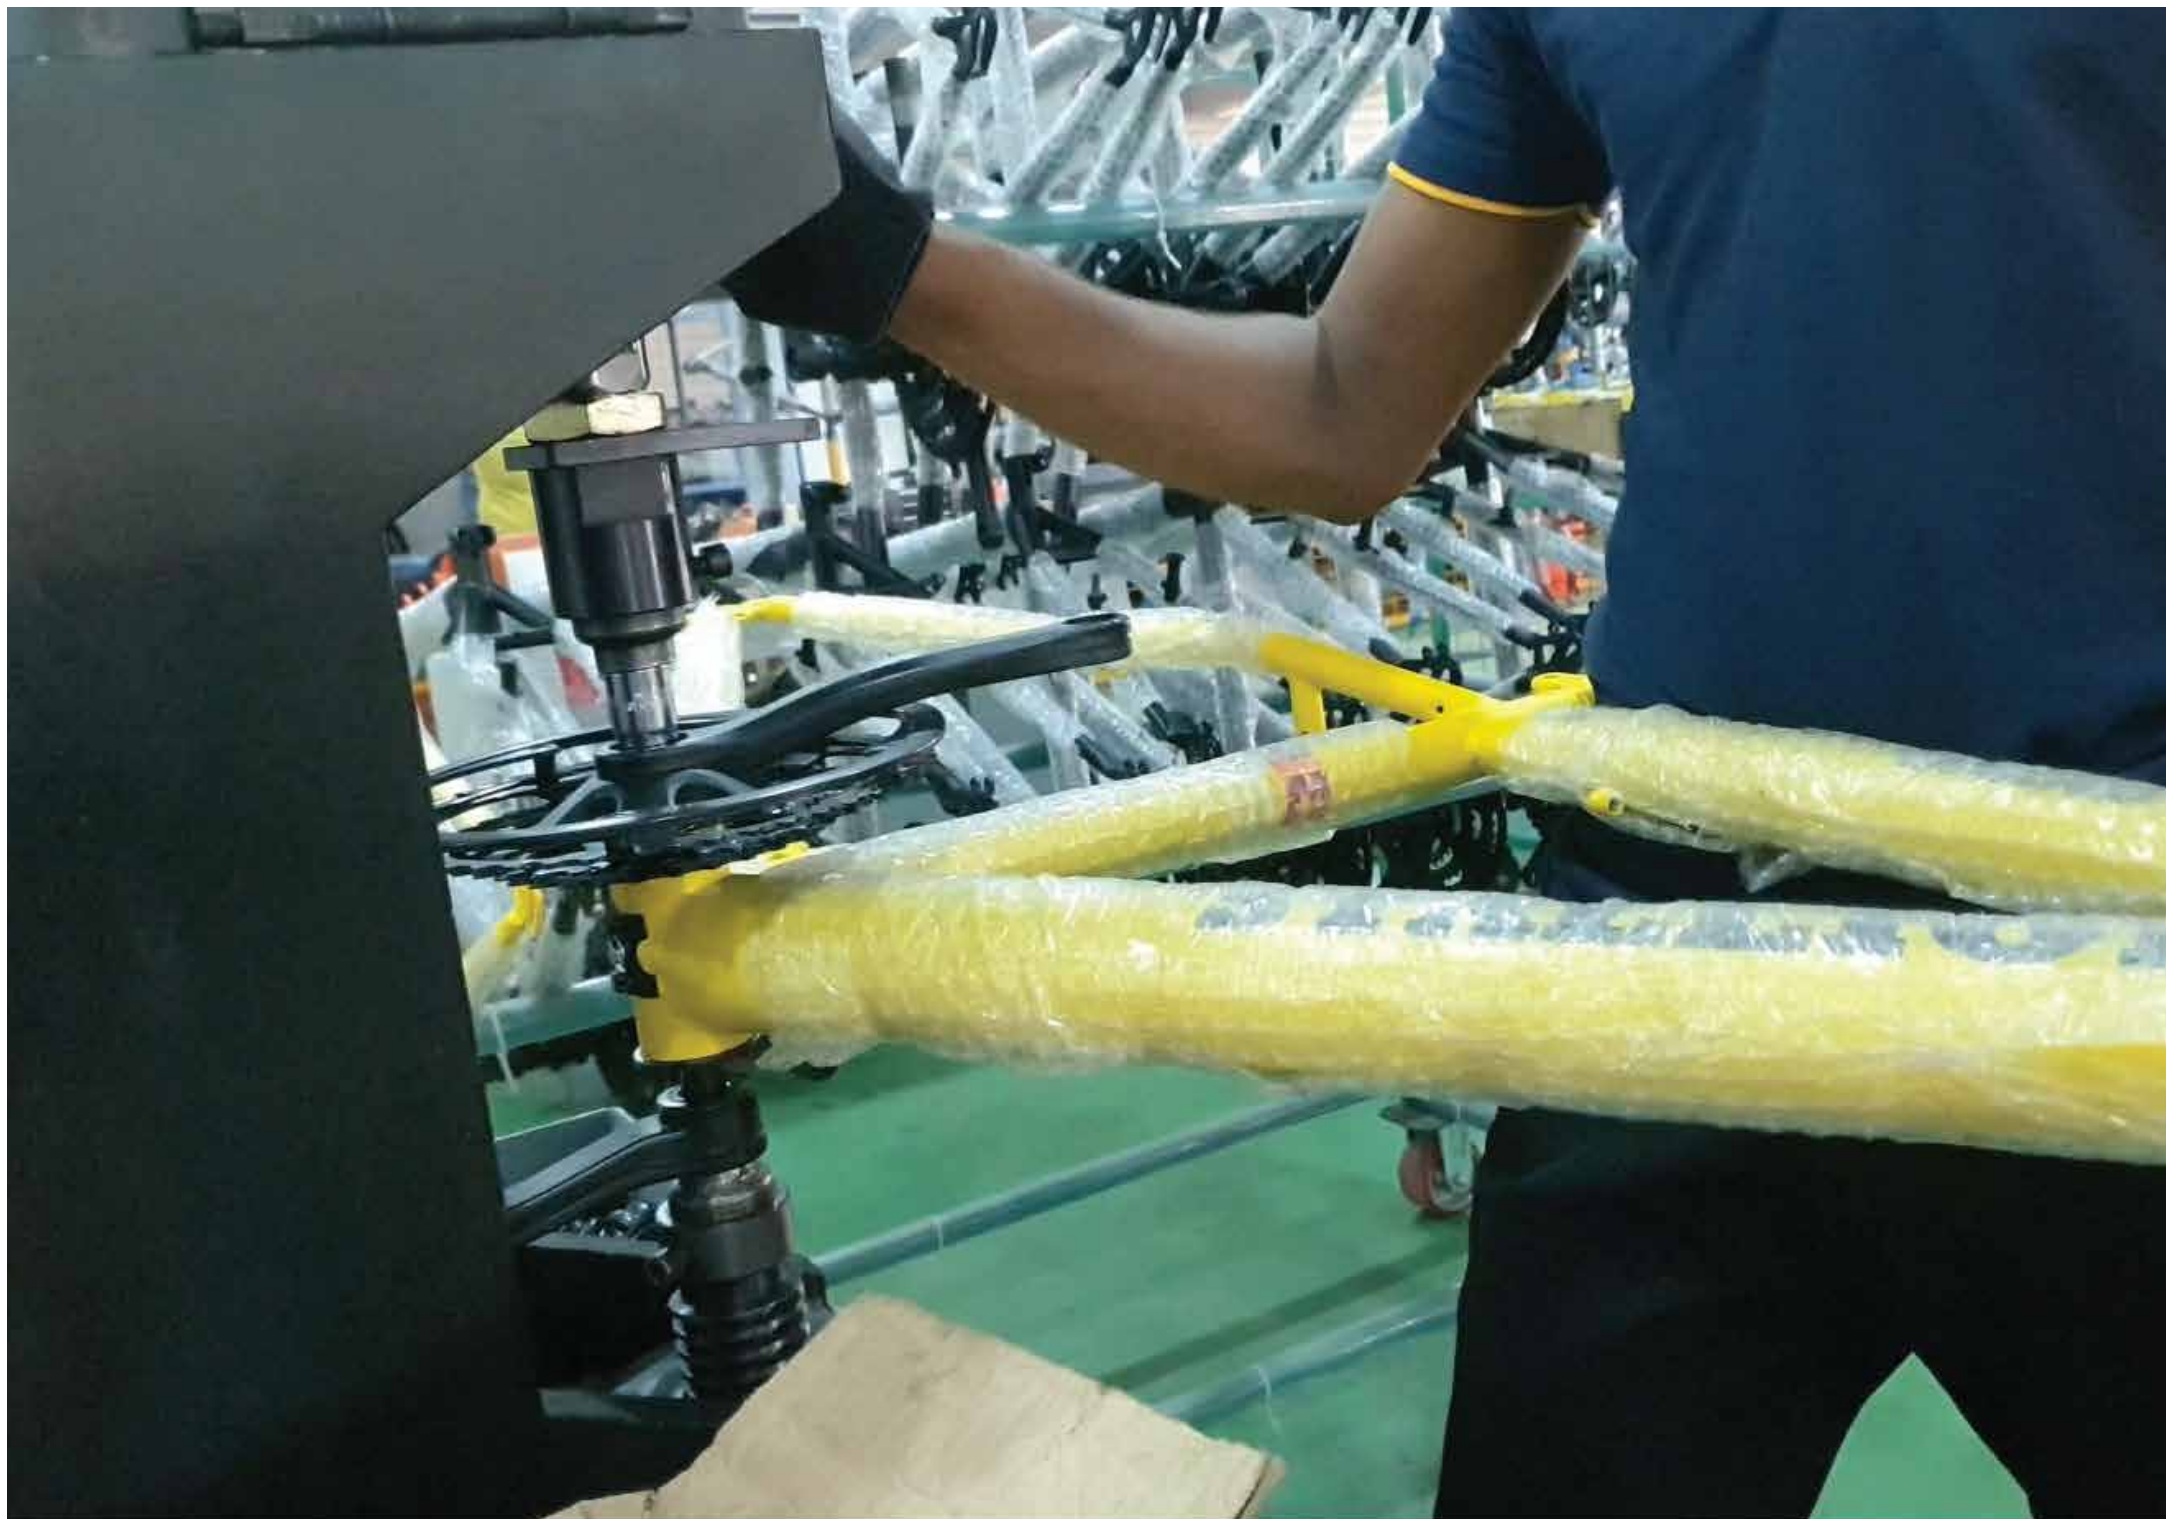

Our registered office is located at Mudungoda, Gampaha. A 10,000sq factory and 10,000sq warehouse is located about 10 km from the office in Kalagedihena area.

# BICYCLE MODELS

Current product portfolio includes kids and adult Mountain bicycles, Road Bicycles and Electric bicycles. We can propose existing models or develop new bicycle models according to customer requirements.

**Delivery ETA for readymade models:**

15-30 Days

**Delivery ETA for new custom models:**

90-120 days
